

## **Guidelines for Pre Ph.D. presentations**

1. The number of slides in the presentation should be 35 to 40.
2. The duration of entire presentation should not exceed 25 minutes.
3. The number of lines in each slide should be up to 10.
4. The first slide should have the proposed title. The second slide should have student's publications list along with their indexing in SCIE/ Scopus/ MCQ etc.
5. The next slide/s should contain the tentative table of contents of the thesis.
6. During the first 5 to 10 minutes of the presentation it is expected that the student should give the brief summary and/ or motivation of the work done in a manner that is understandable by students/ faculties of all the areas. The next 15 to 20 minutes the student may focus on the major technical results chapter wise.
7. In the references only those papers should be listed that are cited by the student in the presentation itself.
8. Mere reading of statements of the theorems from the slide may be avoided as far as possible. The students should tell the crux of the results in own words.
9. The student should give proper reference while presenting someone else result.

## **Guidelines for Pre M. Phil. presentations**

1. The number of slides in the presentation should be 35 to 40.
2. The duration of entire presentation should not exceed 25 minutes.
3. The number of lines in each slide should be up to 10.
4. The first slide should have the proposed title. The second slide should have the list of research papers elaborated by the student in their dissertation along with their indexing SCIE/ Scopus/ MCQ etc.
5. The next slide/s should contain the tentative table of contents of the dissertation.
6. During the first 5 to 10 minutes of the presentation it is expected that the student should give the brief summary and/ or motivation of the work elaborated in a manner that is understandable by students/ faculties of all the areas. The next 15 to 20 minutes the student may focus on the major technical results chapter wise.
7. In the references only those papers should be listed that are cited by the student in the presentation itself.
